

# 10 REASONS

You Should Be Using The INTEGRA System®

1. **INTEGRA®** capsules are inverted, which allows you to completely empty the contents of the capsule, using 100% of the products.
2. **INTEGRA®** products come factory sealed. They do not open until they are correctly placed in the **INTEGRA® Activator**. Capsules also re-seal when removed from the **Activator**. These features promote employee safety.
3. **INTEGRA®** products come in one-gallon containers. This eliminates heavy lifting and reduces possible workmen's comp claims.
4. **INTEGRA®** capsules are compact and easy to store, taking only half the space of conventional packaging.
5. **The INTEGRA System®** is modular. Capsules can be placed where it's easy for employees to see and change them – no buckets behind the machine or hidden under the table empty!
6. With the exclusive **Safety Shield**, **INTEGRA®** systems have a built in spill containment ability.
7. Users don't have to touch chemicals when changing containers. Capsules are completely disposable and recyclable.
8. The **ContinuousFeed Reservoir** holds 8 ozs. When the capsule is empty, you still have 8 ozs. of product to keep you running while changing capsules.
9. **INTEGRA®** systems serve both kitchen and laundry areas, so employees will not be confused with different "systems" when working in other areas of your facility.
10. **INTEGRA®** systems mount on the wall eliminating chemical messes on your floors and around equipment. This also avoids possible health department issues with products on the floor.

## THE INTEGRA SYSTEM®

*The INTEGRA System® was developed over many years and is the most innovative product delivery system on the market today. In a very real sense, it is **The INTEGRA System®** that makes **INTEGRA®** what it is.*

***INTEGRA®** capsules are inverted, allowing you to completely empty the contents of the capsule, using 100% of the products.*

**The INTEGRA® Fluid Staging and Dispensing System**  
**Patent #7,658,213**

The **INTEGRA System®** starts with the **INTEGRA®** capsule. The capsule is unique, because all **INTEGRA®** products are packaged in one-gallon containers to save you storage space and eliminate heavy lifting by your employees.

The capsule comes to you factory sealed by **INTEGRA®**'s proprietary **SurSeal Insert**. The Insert is designed to open the capsule only when it is properly put in place in the **INTEGRA® Activator**. If removed from this position, the Capsule re-seals itself.

The **INTEGRA® Activator** is designed to attach to the **INTEGRA® Load N' Lock** wall bracket for mounting.

By doing this, **INTEGRA®** products can be positioned close to their use point, and mounted up off the floor. Wall mounting eliminates damage to your floors, makes areas around your equipment easy to keep clean, and helps prevent health department complaints.

The **Activator** has several features that provide you with extra benefits. Let's start off first with the **Activator's Safety Shield**.

The **Safety Shield** is designed to contain spills. This is a built-in safety feature. The shield will contain the entire contents of one **INTEGRA®** capsule and allow you to continue to use the spilled contents.

Next comes the **Activator's Key**. The **Key** is found at the bottom of the shield in the center of the **Activator**. It is a pointed "finger" that serves the purpose of opening the capsule when it is inverted and inserted into the **INTEGRA® Activator**.

Finally, at the bottom of the activator is the **ContinuousFeed Reservoir**. This reservoir holds eight ounces of **INTEGRA®** product. This allows you to enjoy three important benefits:

1. When using **INTEGRA®**'s **ContinuousFeed Reservoir**, it's easy to see when capsules are empty and they empty completely. No more throwing partially emptied capsules in the trash. You use 100% of the product you pay for – no waste!
2. The **ContinuousFeed Reservoir** holds 8 ozs. When the capsule is empty, you still have 8 ozs. of product to keep you running while changing capsules.
3. The **ContinuousFeed Reservoir** allows your employees to actually see when capsules are empty. It also allows you to see at a glance, when capsules need changing (this is **INTEGRA®**'s "silent supervisor" feature) reducing "out of product" operations and the resulting poor results.
